

Demo of Project Management Cloud based Software

The screenshot displays the Jira Software interface for a project named 'SET-A!'. The left sidebar shows navigation options: 'PLANNING' (Roadmap, Board), 'DEVELOPMENT' (Code), 'Project pages', 'Add shortcut', and 'Project settings'. The main area is titled 'SA board' and shows a Kanban board with columns: 'TO DO' (containing a '+ Create issue' button), 'IN PROGRESS 3 ISSUES' (containing three issues: 'Create json file' (SA-1), 'Create html for the api' (SA-2), and 'Add CSS to it' (SA-3)), and 'DONE'. A 'Quickstart' panel on the right provides instructions on how to use Kanban in Jira. The bottom of the screen shows a Windows taskbar with various application icons and system information like '27°C Mostly sunny' and '11:30 03-02-2023'.

The screenshot displays the Bitbucket interface for a repository named 'SETA!'. The left sidebar shows navigation options: 'Source', 'Commits', 'Branches', 'Pull requests', 'Pipelines', 'Deployments', 'Jira issues', 'Security', 'Downloads', and 'Repository settings'. The main area shows the repository's source files, including a table with columns 'Name', 'Size', 'Last commit', and 'Message'. The table lists two files: '.gitignore' (624 B, 4 minutes ago, Initial commit) and 'README.md' (2.56 KB, 4 minutes ago, Initial commit). Below the table, there is a 'README.md' section with instructions on how to edit a file, create a new file, and clone from Bitbucket. The bottom of the screen shows a Windows taskbar with various application icons and system information like '27°C Mostly sunny' and '11:39 03-02-2023'.

Name	Size	Last commit	Message

Syncing this branch will result in merge conflicts

Resolve the merge conflicts before attempting to sync this branch.

To manually merge these changes into "Neahal-Ughade/mainhtml-edited-online-with-bitbucket-1675405617535", run the following commands:

```
1 git checkout 94da847
2 # Note: This will create a detached head.
3 git merge remotes/origin/main
```

Here's where you'll find this repository's source files. To give your users an idea of what they'll find here, add a description to your repository.

main Files Filter files

/

Name	Size	Last commit	Message
.gitignore	624 B	5 minutes ago	Initial commit
README.md	2.56 KB	5 minutes ago	Initial commit

README.md

Edit a file, create a new file, and clone from Bitbucket in under 2 minutes

When you're done, you can delete the content in this README and update the file with details for others getting started with your repository. We recommend that you open this README in another tab as you perform the tasks below. You can watch our video for a full demo of all the steps in this tutorial. Open the video in a new tab to avoid leaving Bitbucket.

Edit a file

You'll start by editing this README file to learn how to edit a file in Bitbucket.

1. Click **Source** on the left side.
2. Click the README.md link from the list of files.
3. Click the **Edit** button.
4. Delete the following text: *Delete this line to make a change to the README from Bitbucket.*

age, click **Commit** and then **Commit** again in the dialog. The commit page will open and you'll see the change you just made.
